

### **Total Technologies, Ltd.'s HDMI cable has passed ATC compliance testing!**

**Irvine, Calif., October 6, 2004** iX Total Technologies, Ltd. ® (TTL), a Global Supplier of cable assemblies and adapters to OEM customers, is proud to announce that its HDMI to HDMI (5 meter) cable has passed Silicon Image's ATC compliance testing. TTL's HDMI licensed product successfully completed ATC compliance testing in accordance with the HDMI Compliance Test Specification, revision 1.1. TTL's President, George Huang, said "This achievement is vital to TTL's role in the High-Speed, High-Bandwidth, High-Frequency world, and will be used as a premise for every HDMI product manufactured by TTL." He also stated that "TTL's Long distance HDMI, Hi-Definition Picture Quality (Hi-PQ™Series) cable compliance is the next milestone we will achieve." New products to be announced include a new line of HDMI (Hi-PQ™Series) cables with optional CL2-rated wire, utilized for in-the-wall systems installations.

TTL's HDMI cables incorporate its patented RF-BLOK® Shielding Can Design which avoids potential high pressure and temperature damage that can occur during the injection molding process. This type of damage causes intermittence, color degradation, and interference. Since 2001, the RF-BLOK® has gained worldwide popularity and recognition with DVI, M1-D/A, and SVGA/UXGA cable assemblies and adapters. This patented design has enabled OEM's the ability to supply cables without the need to apply ferrite cores. This not only reduces costs and overall savings, but enhances the picture quality and performance of their entire system. A complete line of Super Slim and Compact (SSAC™) HDMIDVI adapters, DVI-HD15 adapters, and M1-D adapters are available to meet requirements of legacy systems. This patented one piece, seamless, all metal solder-less design, results in superior shielding, low resistance, and extremely high reliability. TTL's current HDMI connecting design is under patent pending, not only in the U.S., but worldwide.

#### **About Total Technologies, Ltd.®:**

Total Technologies, Ltd.® (TTL) is a highly diversified manufacturer of various OEM/ODM cable assemblies, adapters and multimedia interfaces, since 1982. With over 1,200 employees for Global support, 15 worldwide patents, and 60,000 designs, TTL is a promising and outstanding cable supplier. TTL currently produces 7 million assorted cable assemblies and adapters per month. TTL provides high quality products to many of the largest multimedia, telecommunication and computer related peripherals, components and accessories manufacturers in the world. TTL's ECO-Friendly products are designed to meet worldwide requirements such as RoHS, EPA, and California Proposition 65. TTL has been certified by Sony as their first Green Partner with a perfect rating in the cable and connector category. TTL offers excellent R&D design and engineering services, quick lead-time, plus sales and customer support at its offices in Irvine, California, Taiwan, China, Japan, and Germany.
